

REFRIGERATION DRYER

RDL 35 - 480

(Non-cycling refrigeration dryer)

DESCRIPTION

RDL dryers have been designed for efficient compressed air drying, with pressure dew point +5 °C. Drying is achieved on the principle of cooling, which takes place inside a highly efficient and ultra-compact 3 stage aluminium heat exchanger. Developing the series, we focused on essential components and product evolution, with all of our market and R&D experience. Compact size, optimized layout and innovative solutions allowed us to achieve reduced manufacturing costs, whilst maintaining the same levels of reliability, quality and attention to detail. RDL series is designed and manufactured with respect to the environment, promoting energy efficiency and environmentally friendly materials.

DRYER RATING ACCORDING TO ISO 8573-1

Solid particles ⁽¹⁾	Water ^{(1),(2)}	Oil ⁽¹⁾
/	4	/

⁽¹⁾Standard configuration of dryer does not include filters. It is strongly recommended to install prefilter (3 µm) upstream the dryer.

⁽²⁾ Pressure dew point also depends on specific operating conditions.
